RH45

DATASHEET

10mm thick bars, solid interlocking fingers for floating installation and a pressure load capacity of 450 to/m² - with this model you can really talk about „strong as a lion“. With dimensions of 41x41x4.5cm (LxWxH) and a weight of approx. 3.8kg/piece, installation is quick (6 pieces/square meter) and effortless.

The flexible composite system with floating installation is much more versatile compared to rigid joints and can therefore better adapt to, for example, large temperature differences. In addition, this floating installation reduces punctual impacts and shocks even better than a rigid installation, which of course is also a relief for horse and rider.

Designed for extreme use, EQU-GRID RH45 is the top of our product range. From riding arenas to driveways and other heavy-duty surfaces, EQU-GRID RH45 can handle it all!

PRODUCT DETAILS

Outside dimensions: 41 x 41 cm

Height: 4,5 cm

material thickness: > 10 mm

cutouts in the grid: 25x

pieces per m²: 6

Weight: approx. 3,8 kg / piece - approx. 22,8 kg / m² (± 5%)

Material: 100% recycled material

Color: Dark gray - Black

Dimensional stability: +/- 3% (-10°C to +30°C)

Warranty: 20 years

„Bioactive“ surface: open area approx. 63%.

Compressive load capacity: 450 tons / m² (backfilled)

Environment: Neutral to groundwater and environment.

The product is resistant to acids, alkalis (de-icing salt, ammonia, etc.) and alcohols.

SHIPPING DETAILS

180 pieces per pallet = 30 m² per pallet

30 layers per pallet a 6 pieces

Pallet dimensions: LxWxH approx. 129x88x150 cm

Weight per pallet: approx. ca. 700 kg
