RL50

DATASHEET

The dimensions of 50x50x5 cm (LxWxH) and the low weight of approx. 3.5 kg / piece ensure quick and easy installation. The composite anchor system creates a single, large and securely coherent surface - all individual grids are firmly connected to each other through it. Due to the special material formulation, the panel is significantly more slip-resistant than comparable products made of simple hard plastic.

EQU-GRID RL50 is ideal for all heavy-duty outdoor applications, such as: paddocks, runs, open stables, paddock trails, paths (passable), storage areas, grooming and washing areas, watering and feeding areas, walkways, etc. Of course, the economical construction of riding arenas and riding halls is also possible.

The permanent, reliable separation of sub-base and footing is the most important basic function of grids on riding arenas and all other more heavily used surfaces. Our EQU-GRID RL50 was developed especially for this high load. 5mm thick bars, solid connecting anchors and a large bearing surface distinguish our model RL50 among many other advantages.

PRODUCT DETAILS

External dimensions: 50 x 50 cm

Height: 5 cm

Material thickness: 5 mm

Grid: 49 x - 6,2 cm x 6,2 cm (per grid)

Pieces per m²: 4 (pre-assembled)

Weight: approx. 3.6 kg / piece - approx. 14.5 kg / m² (± 5%)

Material: 100% recycled material

Color: Dark gray - Black

Dimensional stability: +/- 3% (-10°C to +30°C)

Warranty: 20 years

„Bioactive“ surface: open area 86%, material 14%.

Pressure load capacity: 450 tons / m² (with filling)

Environment: Neutral to groundwater and environment.

The product is resistant to acids, alkalis (road salt, ammonia, etc.) and alcohols.

SHIPPING DETAILS

160 pieces per pallet = 40 m² per pallet

40 layers per pallet a 4 pieces

Pallet dimensions: LxWxH approx. 100x120x220 cm

Weight per pallet: approx. 610 kg
